Comments from the Alliance for Natural Health

FCC Docket No: 25-133

The Alliance for Natural Health (ANH) hereby submits the following comments in response to the FCC's opening of a public docket in which the agency seeks comment on every rule, regulation, or guidance document that the agency should eliminate for the purposes of alleviating unnecessary regulatory burdens.

ANH is a Virginia nonprofit corporation founded in 1992. Formerly the American Association for Health Freedom, and, before that, the American Preventative Medical Association, ANH is a membership-based organization consisting of consumers, healthcare practitioners, food, medical food, and dietary supplement company members, and half a million consumer advocate members.

Below, please find ANH's comments, along with the signatures of 1,261 ANH consumer advocates.

FCC: Prioritize Public Health Over Telecom Profits Signers

FCC: Prioritize Public Health Over Telecom Profits

Mounting evidence shows radio frequency radiation (RFR), especially in higher frequencies, is harmful to human health. Yet 5G and millimeter wave technologies are advancing without proof of safety. Even current cell phone use, particularly by children, likely exceeds safe thresholds. International standards, based on thermal effects, ignore conclusive evidence that non-thermal effects pose the greatest long-term risks. We need stronger safety standards to better protect Americans, especially children.
In the interest of regulatory reform, the FCC should consider the following:• Reevaluate RF exposure standards to incorporate the latest scientific research on non-thermal biological effects.
• Require independent safety testing of wireless devices and infrastructure, rather than relying on industry-funded studies.
• Restore local control over 5G deployment, allowing communities to regulate wireless infrastructure based on health and environmental concerns.
• Implement a moratorium on 5G expansion until thorough, independent research confirms its safety.

Total Signatures: 1261
